><p>tails was working in his workshop on a few weapons for his friends in case if an attack from Man when heard a knock at the door. whom would come to my old workshop in the middle of the night? tails thought as he walked to the doors lock mechanism.

'coming!' tails yelled

tails turned the latch and slid an iron beam across the door to the side and opened the door, o his surprise it was Cosmo, the green haired plant/animal that tails has a very large crush on.

'Tails! i missed you!' Cosmo immediately hugged tails nearly knocking him over on to the floor. tails blushed seeing her so close,

'i missed you too Cosmo.' he said staggering, trying to keep his balance.

'why are you here so late at night? you should be back at the house asleep!' tails worried over the Seedrian.

'i couldn't sleep without my favorite fox!' she said wondering what his reaction would be.

she got a large blush and a stammer from the two tailed fox. she smiled and kissed him right on the nose, causing more stammering and a bright red blush, making Cosmo giggle.

'your so cute when your shy!' she said as she broke the hug and

grabbed a small bag on her waist and handed it to tails,

'here, i found this and fixed it up! don't open it up until you are alone!' she said smiling

tails took the small red bag. it had a yellow cord that keep the small bag closed. it was just small enough to fit in his palm. he rubbed through the silk bag feeling a spherical hard object inside the bag. a little rough but mostly smooth.

'what is it?' tails asked widely confused on what the bag could hold.

'oh, you'll find out.' she smiled at him as she walked out the door.

'bie! see ya at the house!' she yelled as she walked away.

'wha...?' he started but didn't finish

he sighed and closed and locked the door. _what could it be? _he asked him self, tempted to open it right there. all of a sudden the room started to to rumble.

'what the hell is going on?' he yelled to no one specific.

he ran back to the door, unlocked it and ran outside seeing a blaze heading right for him, but to the side. he backed away and started to run from the ball of fire but it just keep adjusting its trajectory. finally it hit ground about a mile away from his house and tails was still running for the meteor was still moving but it was making a ditch as it dragged along just behind tails. finally the meteor stopped and slid to a stop. tails felt the world stop rumbling and slowed down and looked back. he turned around and stopped in front of the meteor to see that it had small wings and it was made out of steel! he jumped down into the ditch that was made by the meteor and looked at the thrusters and realized that happened intentionally.

'what the hell is that thing and what is it doing chasing me, tails the fox for no clear reason!' tails yelled at the strange craft.

tails noticed something on the side of the pod, 'S.A.D.P.?' Tails read, not knowing what it meant.

the pod responded with a hiss an a panel pushed in and slid to the right on the top side of the pod.

'hello, tails' the pod stated scaring the crap out of tails.

'u-u-u-m w-what the hell are you?' he stammered starting to get angry at the pod.

'Sorry im Cortona, a program built by the humans and you were the closest ally to this pod that we axedently dropped from unattaching from john 117.' she said as she appeared on a small pillar tha protruded from the top of the pod.

'um what?' his head started to buzz,

so Cortana explained from halo 1-4

so then tails finally got the idea, so he went to pick up the helm of the suit and looked at the visor. tails then started to put it on when Cortana interrupted him, making him stop, put the helmet down and look at Cortana.

'i need to scan your body to make shure the armor is adjusted correctly' she said as small pole no bigger than an a finger, came up and shot a flat beam that circled the pod and scanned tails whom was standing still tapping his foot much like his hedgehog friend. then the rod retreated into the pod. the armor started to change shape immediately. the helmet had two pockets for his ears, the chest, arms, and legs shrank to about 3 inches of space inside. thrusters were destroyed and created into; camo, Regen field, and shield. plus it used the thruster parts to create rocket boots for tails when he flies with the heavy armor.

'thats intresting,' Cortana said as ahs looked at his analyses

'what is it?' tails asked

'its your ability to fly, how in the world does a fox fly?'

'like this!' tails said as he spun his twin tails in a circle in oppisete sides

cortana watched the fox lift off the ground and back to land.

'well you dont fail to impress me, your a mutant, no offence,'
'none taken' he assured her.

tails walked up to the armor and slowly put it on peice by peice. when he put the visor on it auto snaped to the body, making it airtight. he couldint move except for his arms that were quite heavy.

'um, how do i move?' he asked as he flicked his tail irratatedly.

'move your hand to the pilar that im standing on,' she instructed

he did as told and felt the suit compress on his body making him a lot more comfortable. thinking if he would ever get out, the machine interted a nedle in each arm making him yelp a bit.

then he felt a cold pushing sensation radiate from the points of puncure, then the neddles exited his body, and was jetisoned out the sides of the armor.

'dont worry, that will help the armor know how you want to move, just try waving your arm.' she said

tails lifted his arm and noticed that it was weghtless.

'wow that works good!' tails said as he moved his body freely.

'theres nano bots that go to your body nerves and helps you by sending infomation to the armor, making it move.' she informed.

'it will also help me see your bodys reactions, and needs so you can exit the armor easly.' she added.

'well i should get home to cosmo.' he said as he remembered her, then remembering the bag that cosmo gave him.

'open my thigh panel,' tails said

cortana actvated the panel alowing it to open. tails grabed the bag from the side of his waist and shut the panel.

'whats that?' cortana asked

'cosmo gave me this before you chased me in that... thing.'

'oh,' she said, 'sorry,'

'all cool.' he said as he opened the bag

he took out a light blue cristal oval sorta flat on both sides but curved to smothness with 'I Love You' on one side, and a small letters:

Tails i love you with all my heart, i want to be with you all my life. I Love You, Cosmo.

tails blushed hard.

'what is it and what does it say?' cortana asked tails, cuious of why he's blushing.

'Um, well does john have a girl friend?' tails asked, recovering from the shock of the message.

'yea, sorta, he doesn't any more, why do you want to kno- oh, i see.' she said, ansering her oun question.

'don't worry, i won't tell a soul, after all, im a AI movement model, im ment for cheif, and well,

** Thats You**.

End
file.
